

# AgileHead CONSULTING

Product Development Services

An 18-member Consulting Group in  
Bangalore, India.

# Effective Outsourcing.

Outsourcing has its benefits.

But hiring a team halfway across the world is not simple.

We have a suggestion >

# Instead of everyone+dog

*1 Project Manager, 2 Coordinators, 1 Architect, 4 Team Leads, 2 Test Leads, 6 Testers, 6 Senior Developers, 20 Junior Developers, 4 Designers, 6 Analysts.*

# a small team of experts.

Each member in our team  
has at least 8 years of experience.

From leading big teams to being part of  
startups, they have played key roles.

# Very lean. Very agile.

Everybody writes code.

Money goes into building the product,  
not meetings and management.

Simple Collaboration.

There are fewer people to talk to.  
And you know their names.

Release early, release often.

There are no 6 month project plans.  
Get to *Beta* ASAP.

# And solid engineering.

## Researched Technology Choices

Modern Languages, Frameworks and Tooling to dramatically improve efficiency.

## We make the technology work hard.

Maximize automation with statically verifiable code and comprehensive test suites.

## Daily Releases.

Every day there is a build.  
Mistakes are identified early.

# If we were to build\* ...

- Project Mgmt., **like BaseCamp** - **\$27,000**
- An auction site, **like Ebay** - **\$27,000**
- Video sharing, **like YouTube** - **\$18,000**
- Social Networking, **like FaceBook** - **\$27,000**
- Social Messaging, **like Twitter** - **\$10,000**

\* With all essential features, in about 5 weeks.

\* And enough scalability to get started.

AgileHead's skills are  
**'measurable'**.

Just last month, we open sourced  
3 projects with more than  
**200,000** lines of code.

# Case 1: Social Ray

# Case 2: AgileFx

## Rapid Development Framework for .Net

The screenshot shows the AgileFx website homepage. At the top left is the AgileFx logo, a green silhouette of a reindeer. To its right is a navigation menu with links for HOME, TUTORIALS, DOWNLOAD, DOCS, ISSUES, and BLOG. Below the navigation is a dark blue banner with the text "The fastest ORM available on .Net" and a small reindeer icon on the right. The main content area is divided into three columns: "Get Started" with a video player icon and a link to "screencast + tutorials"; "Download" with a large blue arrow pointing down containing the text "version 1.0 beta"; and "APIs and Docs" with a keyboard icon and a link to "read documentation". Below the banner, the "What is AgileFx?" section contains a list of features and a paragraph of text. The "Download" section shows two download buttons for Visual Studio 2010 and Visual Studio 2008, with a paragraph of text below them. The "Open Source" section is partially visible at the bottom right.

### The fastest ORM available on .Net

- ✓ Many to Many Relationships
- ✓ Inheritance (Table per Type)
- ✓ Eager Loading
- ✓ Parallel Queries
- ✓ Caching
- ✓ Full LINQ Support
- ✓ Visual Studio Integration

**Get Started**  
screencast + tutorials

**Download**  
version 1.0<sup>beta</sup>

**APIs and Docs**  
read documentation

#### What is AgileFx?

AgileFx is a LINQ-based ORM for the .Net Framework, with features comparable to Entity Framework and special attention given to performance.

AgileFx was started in late 2009 by [AgileHead](#), when customers requested an ORM which is as fast as Linq to Sql, but having the more advanced features found in Entity Framework. Linq to Sql was great for performance; it usually produced highly optimized queries comparable to handwritten queries. Unfortunately, Linq to Sql lacked many important features (like Inheritance and Many-to-Many relationships) which made modeling real world applications impossible.

AgileFx extends the Linq to Sql provider with many of these missing features, while retaining its outstanding performance profile.

#### Is there designer support?

Yes.

#### Download

AgileFx 1.0 for Visual Studio 2010

AgileFx 1.0 for Visual Studio 2008

The download includes the AgileFx ORM framework, modeling tools for Visual Studio, and some batteries for Asp.Net MVC if you need them.

#### Open Source

[www.agilefx.org](http://www.agilefx.org)

# Technology Competence

- **Microsoft:** .Net Platform, Asp.Net (& MVC), SharePoint, DSLs, Visual Studio Extensibility
- **Open Source & Java:** Python (Django), Java (Spring, Struts, Hibernate), Scala (Lift), Ruby on Rails, PHP.
- **Enterprise Applications:** Oracle BPM, Microsoft Biztalk Server
- **Devices:** Android, iPhone, Windows Mobile
